

Domain-Centric Style

```
graph LR; A[Domain-Centric Style] --- B[The domain or business logic is the core of the system.]; A --- C[the system is independent on any framework , user interface , database or any other infrastructure component.]; A --- D[All Business Logic or Rules are Implemented on the application code not in the database.];
```

A mind map diagram with a central dark blue node labeled 'Domain-Centric Style'. Three lines radiate from this central node to three peripheral nodes. The top node is red and contains the text 'The domain or business logic is the core of the system.'. The middle node is orange and contains the text 'the system is independent on any framework , user interface , database or any other infrastructure component.'. The bottom node is yellow and contains the text 'All Business Logic or Rules are Implemented on the application code not in the database.'.

The domain or business logic is the core of the system.

the system is independent on any framework , user interface , database or any other infrastructure component.

All Business Logic or Rules are Implemented on the application code not in the database.
